THE ISLAND WATER ASSOCIATION, INC.

March 19, 2021

Dear Member,

The Island Water Association, Inc. (IWA) is initiating the construction of a water main replacement project within the Caloosa Shores Subdivision. The improvement project is part of an ongoing program to proactively upgrade infrastructure that has been identified as undersized or prone to leakage. The funding for the project is entirely from the IWA capital budget for 2021 and adds no additional cost to our members.

The improvement project includes upgrading the size and quality of water main materials along Caloosa End Lane and Punta Caloosa Court. Construction is expected to begin in mid-April and will continue for several months thereafter. While no direct impacts should be experienced by property owners on Indian Court, there will be an increase in construction related traffic and equipment along Caloosa Drive throughout the project.

At the conclusion of the project, the excavated areas will be restored as close as reasonably possible to the preexisting condition. There may be areas that remain disturbed for the duration of the project. These areas often require multiple excavations and are typically necessary to satisfy regulatory requirements.

Vegetation and private irrigation systems within the right-of-way and utility easements are often a source of frustration during these projects for both the homeowner and the contractor. The contractors will do their best to avoid/minimize damage. However, it may be necessary to impact these items to allow the installation.

During the project, there will be periodic interruptions to water service and traffic flow. IWA will do its best to notify you in advance and minimize the duration of these interruptions. The status of the construction project will be routinely updated and available at IWA's website, www.islandwater.com.

We appreciate your patience during the construction process as we improve your member-owned water system.

Sincerely,

The Island Water Association, Inc.

Diana J. Wilson
General Manager
